

School: GIRRAWEEEN HIGH SCHOOL

Situation: School is situated near Girraween.

It was established in 1975.

Statement of intent:

Issues

(Problems identified from the audits)

Curriculum: All courses are incorporating environmental education into teaching programs where appropriate.

Management of resources: Paper use and water use.

Management of school grounds: The new erosion control measures will need to be evaluated

The new area will be monitored to see if the surface can cope with the traffic.

Action Plan

Curriculum:

Streamwatch continued;

Each faculty to continue to stress environmental issues where relevant.

Management of resources:

Paper use :

recycling to continue;

system to control classroom wastage to be introduced;

budget monitoring;

staff awareness raised.

Water use in school:

Prompt attention to maintenance issues;

GA to check systems each week.

Management of school grounds:

Eroded areas of grounds on western and eastern sides of school monitored;

Playground care: see attached sheet.

Environment Committee

Committee Membership:

Staff

Students.

The committee will monitor environmental issues in the school.

Monitoring and evaluation

Progress will be monitored against the framework: "*Stages in becoming an environmentally active school*". This process will determine how effectively

environmental education is being taught.

Reporting

The school will report on the progress of the environmental management plan in its annual report.

Future directions

The school will continue to monitor its progress. Other environmental problems identified in the audits will be addressed in next year's SEMP.
